INDEX TO VOLUME 60

Author Index

Abdelrahman, A., R. C. Hoseney, and E. Varriano-Marston. Milling process to produce low-fat grits from pearl millet, 189
Abraham, T. E., K. C. M. Raja, E. P. Manoharan, and E. G. Mathew. Effect of heat-moisture treatment on textural characteristics of cassava flour, 7
Abramson, D., R. N. Sinha, and J. T. Mills. Mycotoxin and odor formation in barley stored at 16 and 20% moisture in Manitoba, 350
Adeli, K. *See* L. S. Robert, 231
Ahokas, H. Communication to the editor. A simple and inexpensive visual method for distinguishing between high-lysine and normal-lysine barley kernels, 330
Ali, M. R. *See* R. B. H. Wills, 12
Al-Kaissi, A. A. *See* A. H. Al-Zubaydi, 56
Altosaar, I. *See* L. S. Robert, 231, 438; A. A. Urquhart, 181
Al-Zubaydi, A. H., A. A. Al-Kaissi, K. A. Shaker, and S. M. Hamel. Use of date syrups in breadmaking, 56
Anderson, F. W. *See* M. Cheryan, 235
Anderson, R. A. *See* A. J. Peplinski, 442
Atwell, W. A., B. M. Patrick, L. A. Johnson, and R. W. Glass. Characterization of quinoa starch, 9

Bagley, E. B. *See* D. D. Christianson, 116
Baker, D. The determination of fiber in processed cereal foods by near-infrared reflectance spectroscopy, 217
Baker, L. M. *See* L. U. Thompson, 71
Banasik, O. J. *See* K. Khan, 178
Baruch, D. W., L. D. Jenkins, H. N. Dengate, and P. Meredith. Nonlinear model of wheat starch granule distribution at several stages of development, 32
Bates, L. *See* K. Lorenz, 360; E. I. Ortega, 107
Bean, M. M., E. A. Elliston-Hoops, and K. D. Nishita. Rice flour treatment for cake-baking applications, 445
Bedolla, S., M. G. de Palacios, L. W. Rooney, K. C. Diehl, and M. N. Khan. Cooking characteristics of sorghum and corn for tortilla preparation by several cooking methods, 263
Békés, F., U. Zawistowski, and W. Bushuk. Lipid-mediated aggregation of gliadin, 379
_____, _____, and _____. Protein-lipid complexes in the gliadin fraction, 371
Bohlin, L. *See* T. Mita, 93
Briggs, G. M. Communication to the editor, 92
Brown, R. A. *See* R. C. Hoseney, 124
Burroughs, R. *See* L. M. Seitz, 127
Bushuk, W. *See* O. Paredes-Lopez, 19, 24; F. Békés, 371, 379

Cavins, J. F. *See* W. J. Garcia, 388
Chen, Y.-L., and O. R. Kunze. Effect of environmental changes on rice yield and particle size of broken kernels, 238
Cheryan, M., F. W. Anderson, and F. Grynspan. Magnesium-phytate complexes: Effect of pH and molar ratio on solubility characteristics, 235
Christianson, D. D., and E. B. Bagley. Apparent viscosities of dispersions of swollen cornstarch granules, 116
Chung, D. S. *See* B. R. Sebree, 147, 151
Cloke, J. D., J. Gordon, and E. A. Davis. Enthalpy changes in model cake systems containing emulsifiers, 143
Cole, E. W., J. V. Torres, and D. D. Kasarda. Aggregation of A-gliadin: Gel permeation chromatography, 306
_____. *See* J. G. Fullington, 65
Cooper, D. B. *See* G. L. Lookhart, 111
Culbertson, J. D. *See* J. R. Powers, 427

D'Appolonia, B. L. *See* L. A. MacArthur, 456; W. Pisesookbunterng, 298, 301
Davis, E. A. *See* J. D. Cloke, 143
DeHaas, B. W., and K. J. Goering. Barley starch. VII. New barley starches with fragmented granules, 327
Dengate, H. N. *See* D. W. Baruch, 32
de Palacios, M. G. *See* S. Bedolla, 263
Dexter, J. E., R. H. Kilborn, B. C. Morgan, and R. R. Matsuo. Grain Research Laboratory compression tester: Instrumental measurement of cooked spaghetti stickiness, 139
_____. *See* P. M. Scott, 421
Deyoe, C. W. *See* N. H. Oh, 433
Dick, J. W., and J. S. Quick. A modified screening test for rapid estimation of gluten strength in early-generation durum wheat breeding lines, 315
Diehl, K. C. *See* S. Bedolla, 263
Dikeman, E. *See* Y. Pomeranz, 80
Doherty, C. A. *See* C. F. Earp, 408
Donelson, J. R. *See* W. T. Yamazaki, 344
Donovan, J. W., K. Lorenz, and K. Kulp. Differential scanning calorimetry of heat-moisture treated wheat and potato starches, 381

Earp, C. F., C. A. Doherty, and L. W. Rooney. Fluorescence microscopy of the pericarp, aleurone layer, and endosperm cell walls of three sorghum cultivars, 408
_____. *See* J. F. Scheuring, 86
Ebeler, S. E., and C. E. Walker. Wheat and composite flour *chapaties*: Effects of soy flour and sucrose-ester emulsifiers, 270
Eckhoff, S. R., J. F. Tuite, G. H. Foster, A. W. Kirleis, and M. R. Okos. Microbial growth inhibition by SO_2 or SO_2 plus NH_3 treatments during slow drying of corn, 185
_____. *See* A. J. Peplinski, 442
El-Farra, A.-H. A. *See* H. M. El-Saied, 131
Ellis, R., and E. R. Morris. Improved ion-exchange phytate method, 121
Elliston-Hoops, E. A. *See* M. M. Bean, 445
El-Negoumy, A. M., C. W. Newman, and B. R. Moss. Composition of acid- and alkali-extracted barley proteins as revealed by isoelectric focusing, 429
El-Saied, H. M., and A.-H. A. El-Farra. Utilization of aqueous by-products from starch for improving bread quality, 131
Evans, J. J. *See* D. D. Morey, 461
Eyestone, W. *See* C. C. Tsen, 295

Faridi, H. A., and G. L. Rubenthaler. Experimental baking techniques for evaluating Pacific Northwest wheats in North African breads, 74
Faubion, J. M. *See* D. H. Hahn, 255
Fehr, W. R. *See* H. L. Wang, 245
Fellers, D. A., A. P. Mossman, and H. Suzuki. Rice stickiness. II. Application of an Instron method to make varietal comparisons and to study modification of milled rice by hot-air treatment, 292
_____. *See* A. P. Mossman, 286
Finney, K. F. *See* B. L. Jones, 276; M. Monsivais, 51
Foster, G. H. *See* S. R. Eckhoff, 185
Frølich, W., and B. Hestangen. Dietary fiber content of different cereal products in Norway, 82
Fujino, Y. *See* S. Ito, 252
Fullington, J. G., E. W. Cole, and D. D. Kasarda. Quantitative sodium dodecyl sulfate-polyacrylamide gel electrophoresis of total proteins extracted from different wheat varieties: Effect of protein content, 65

Garcia, W. J., J. F. Cavins, G. E. Inglett, A. S. Heagle, and W. F. Kwolek. Quality of corn grain from plants exposed to chronic levels of ozone, 388
Gelroth, J. A. *See* G. S. Ranhotra, 325
Ghiasi, K., R. C. Hoseney, and E. Varriano-Marston. Effects of flour components and dough ingredients on starch gelatinization, 58
Glass, R. W. *See* W. A. Atwell, 9

Subject Index

Pages of errata are in italics.

Acid
  hydrochloric-; effect on types of proteins extracted from barley (El-Negoumy et al), 429
Aflatoxin
  contamination of preharvest sorghum (McMillian et al), 226
Aggregation
  of gliadin fractions mediated by lipids (Békés et al), 379
Akara
  compositional, physical, sensory characteristics (McWatters), 333
Alkali
  sodium hydroxide; effect on types of proteins extracted from barley (El-Negoumy et al), 429
α-Amylase
  binding of calcium (Jacobsen and Slotfeldt-Ellingsen), 392
  catalyzed starch granule hydrolysis by cycloheptaamylose (Weselake and Hill), 98
  determination in wheat flour; nephelometric and Phadebas methods compared (Hsu and Varriano-Marston), 46
  interaction of purified bean glycoprotein with insect amylase (Powers and Culbertson), 427
  resistivity of new barley starches with fragmented granules (DeHaas et al), 327
  separation of barley malt by chromatofocusing (Marchylo and MacGregor), 311
Amino acids
  in brewers condensed solubles (Sebree et al), 147
  composition of cultivars of wheat, oats, barley, rye, triticale, soybean, and wheat forage (Morey and Evans), 461
  composition of wheat, wheat milling fractions, and botanical constituents of wheat (Jensen and Martens), 172
  4-hydroxy-proline in plants, communication to the editor (Willemot and Jones), 332
  sequence; conformation of corn zein and glutelin fractions with (Wu et al), 342
  in sprouted wheat flour (Lorenz et al), 360
Ammonia
  gaseous; for treatment of flour (Terada et al), 90
Amylose
  characterization of quinoa starch (Atwell et al), 9
  content of lily starch and structure (Takeda et al), 212
Ash
  computerized HRS wheat cumulative ash curves (Lillard and Hertsgaard), 42

Baking
  angel food cakes; xanthan gum and reduced-egg-white levels (Miller and Setser), 62
  breads from winged bean composite; nutritional quality of (Nmorka and Okezie), 198
  cake; foam drainage in batter (Mizukoshi), 399
  cake; rice flour treatment for (Bean et al), 445
  cake; silicone effect on foam stability of batter (Mizukoshi), 396
  cookies; from soft white wheat flour, standing vs. lodging (Pumphrey and Rubenthaler), 268
  development and "undevelopment" of wheat dough by mixing; physicochemical studies (Paredes-Lopez and Bushuk), 19
  effects of gamma radiation, on properties of (MacArthur and D'Appolonia), 456
  laboratory method for *chapaties* (Ebeler and Walker), 270
  layer cakes using aspartame with and without fructose (Hess and Setser), 337
  quick breads; soy or field pea flour incorporation in (Raidl and Klein), 367
  techniques to evaluate Pacific Northwest wheats in North African breads (Faridi and Rubenthaler), 74
  of wheat-oat composite flours (Oomah), 220
Barley
  amino acid composition of (Morey and Evans), 461
  α-amylases in germinated barley (Marchylo and MacGregor), 311
  fragmented granule starches in new varieties (DeHaas et al), 327
  glutamic acid decarboxylase activity as measure of percent germination for (Lamkin et al), 166
  kernel lysine distinguished, communication to the editor (Ahokas), 330
  mycotoxin and odor formation in (Abramson et al), 350
Bioavailability
  in vitro method for trace elements (Jacobsen and Slotfeldt-Ellingsen), 392
  of magnesium in mineral- and soy-fortified breads (Winterringer and Ranhotra), 14, *184*
Bran
  effect on cookie quality (Jeltema et al), 227
  genetic and nongenetic variation of minerals in wheat cultivars (Peterson et al), 450
Bread and breadmaking
  baked from field-sprouted wheat flour (Lorenz et al), 360
  bread baked from ammonia-treated flour (Terada et al), 90
  chapaties; soy flour and sucrose-ester emulsifier effect on (Ebeler and Walker), 270
  date syrups as sugar substitute (Al-Zubaydi et al), 56
  distillers' dried grain as bread ingredient (Tsen et al), 295
  effect of succinylated wheat protein on quality (Thompson and Baker), 71
  effects of germination on characteristics (Morad and Rubenthaler), 413
  flat; Pacific Northwest wheats in (Faridi and Rubenthaler), 74
  of flour containing vomitoxin (Scott et al), 421
  Grain Research Laboratory compression tester description and application to measure crumb properties (Kilborn et al), 134
  Pelshenke test to estimate bread-making properties of hard winter wheats (Monsivais et al), 51
  quality; aqueous by-products from starch for improving (El-Saied and El-Farra), 131
  refreshening role (Pisesookbunterng et al), 301
  soy-fortified-; bioavailability of magnesium (Winterringer and Ranhotra), 14, *184*
  surfactant effect on staling (Pisesookbunterng and D'Appolonia), 298
  wheat-oat flour for (Oomah), 220
  winged bean composite; nutritional quality of (Nmorka and Okezie), 198

Cakes and cookies
  angel food cakes; xanthan gum and reduced-egg-white levels (Miller and Setser), 62
  cake-baking; rice flour treatment for (Bean et al), 445
  cakes; foam drainage in batter (Mizukoshi), 399
  cakes; silicone effect on foam stability of batter (Mizukoshi), 396
  cakes; using aspartame with and without fructose (Hess and Setser), 337
  cookies; quality prediction from dietary fiber components (Jeltema et al), 227
  model cake systems; enthalpy changes in (Cloke et al), 143
  sponge cake baked from ammonia-treated flour (Terada et al), 90
Carbohydrates
  in brewers condensed solubles (Sebree et al), 147
Cassava
  textural modification of flour (Abraham et al), 7
Cereal
  breakfast; determination of fiber in by NIR (Baker), 217
  dietary fiber determination (Frølich and Hestagen), 82
Cereal grains
  amino acid composition of (Morey and Evans), 461
  fluorescence microscopy of sorghum cell walls (Earp et al), 408
Corn
  cooking characteristics of, for tortillas (Bedolla et al), 263
  dry milling of ammonia preserved, ambient air-dried high moisture (Peplinski et al), 442
  glutelin and zein; conformation, optical rotatory dispersion, circular dichroism (Wu et al), 342
  grain; effects on quality and composition from plants exposed to ozone (Garcia et al), 388
  modifier gene(s) effect(s) on proteins and endosperm hardness of *opaque-2* (Ortega and Bates), 107
  ninhydrin color test for screening (Sung and Lambert), 84
  slow drying of; microbial growth inhibition during (Eckhoff et al), 185
  stillage; reverse osmosis of (Wu et al), 248
  zein; polymorphism (Landry and Sallantin), 242
Cornstarch
  physicochemical changes in, as function of extrusion variables (Owusu-Ansah et al), 319

Cowpeas
compositional, physical, sensory characteristics of paste, flour (McWatters), 333

Date products
syrups from dates used in breadmaking (Al-Zubaydi et al), 56
Dehulling
sorghum grain size (Wills and Ali), 12
Dough
effects of gamma radiation of wheat, on (MacArthur and D'Appolonia), 456
wheat-; development and "undevelopment" by mixing, microscopic structure (Paredes-Lopez and Bushuk), 24
wheat-; development and "undevelopment" by mixing, physicochemical studies (Paredes-Lopez and Bushuk), 19
Drying
of corn; microbial growth inhibition during (Eckhoff et al), 185

Electrophoresis
electrofocusing of modified hard-endosperm *opaque*-2 proteins (Ortega and Bates), 107
of gliadins, modification of methodology (Khan et al), 178
of oat globulins, comparison among cultivars of different protein content and through development (Robert et al), 231
of purified bean glycoprotein and insect amylase (Powers and Culbertson), 427
of rye secalins (Shewry et al), 1
of ultracentrifuge separated gluten proteins (Jones et al), 276
wheat protein subunits, relation to protein content (Fullington et al), 65
zein fractionation on Ultrogel Ac44 (Landry and Sallantin), 242
Enzymes
α-amylase resistivity of new varieties of barley starches (DeHaas et al), 327
digestive; inhibition by indigestible polysaccharides (Ikeda and Kusano), 260
glutamic acid decarboxylase activity as measure of percent germination for barley (Lamkin et al), 166
reduction of viscosity of brewers condensed solubles with cellulase and β-glucanase (Sebree et al), 151
separation of barley malt α-amylase by chromatofocusing (Marchylo and MacGregor), 311
Errata
Bemiller and Pratt (Vol. 58, p. 518), 254
Huang, Finn, and Varriano-Marston (Vol. 59, pp. 496, 500), 92
instructions to authors (Vol. 60, p. iii), 184
Jones, Lookhart, Hall, and Finney (Vol. 59, p. 181), 184
Ranhotra, Vetter, Gelroth, and Novak (Vol. 60, p. 325), 464
Winterringer and Ranhotra (Vol. 60, p. 14), 184
Extrusion
variables; physicochemical changes in cornstarch as function of (Owusu-Ansah et al), 319

Fiber
dietary; determination of different cereal products on Norwegian market (Frølich and Hestagen), 82
dietary; inhibitory effects on activities of digestive enzymes (Ikeda and Kusano), 260
in processed cereal foods, NIR for determination (Baker), 217
Flour
containing vomitoxin; use in breadmaking (Scott et al), 421
distillers' dried grain as bread ingredient (Tsen et al), 295
gaseous ammonia-treated (Terada et al), 90
genetic and nongenetic variation of minerals in wheat cultivars (Peterson et al), 450
soy or pea; effects on chemically leavened quick breads (Raidl and Klein), 367
soybean; sensory and volatile characteristics (Warner et al), 102
of sprouted wheat; functionality of (Lorenz et al), 360
of sprouted wheat; rheological properties (Kulp et al), 355
wheat; α-amylase in, nephelometric and Phadebas methods compared (Hsu and Varriano-Marston), 46
wheat; mineral and protein contents of (Pomeranz and Dikeman), 80
wheat-oat composite; baking and related properties of (Oomah), 220
winged bean, triticale, and wheat; nutritional quality of baked products made from (Nmorka and Okezie), 198

Gelatinization
of potato and wheat starches (Donovan et al), 381
Germination
of barley; glutamic acid decarboxylase activity as measure of (Lamkin et al), 166
effect on oats and oat protein (Wu), 418
effects on breadbaking, crumb firmness, and staling (Morad and Rubenthaler), 413
modification of sorghum endosperm (Glennie et al), 27
in relation to caryopsis characteristics of wheat (Huang et al), 161
Gliaden
aggregation of A-gliaden, gel permeation chromatography, microfibrils (Cole et al), 306
computer analysis of electrophoregrams (Lookhart et al), 111
electrophoresis in Na-lactate (Khan et al), 178
protein-lipid complexes in (Békés et al), 371
reversible aggregation mediated by lipids (Békés et al), 379
Gluten
effect of lipids on gliadin-glutenin ratio in bread wheat (Békés et al), 371
fractionation by ultracentrifugation (Jones et al), 276
screening test for estimation of strength in durum wheat breeding lines (Dick and Quick), 315
wheat; effect of glutaraldehyde, potassium bromate, ascorbic acid, and cysteine on rheological properties (Mita and Bohlin), 93
Gum
xanthan; and reduced-egg-white levels in angel food cakes (Miller and Setser), 62

Instructions to authors, iii, (Vol. 60, No. 2)
Instruments and instrumentation
farinograph; effect of succinylated wheat concentrate on characteristics (Thompson and Baker), 71
HPLC determination of free fatty acids in lipid extracts (Tweeten and Wetzel), 411
for measuring textural characteristics of noodles (Oh et al), 433
mineral assay in wheat grain by energy dispersive x-ray spectrometry (Peterson et al), 450
Isoelectric focusing
of barley protein fractions (El-Negoumy et al), 429

Legumes
heat inactivation of trypsin inhibitor in kintoki bean (Tsukamoto et al), 194
kintoki beans; purification and characterization of three trypsin inhibitors (Tsukamoto et al), 281
Lily
properties of starch (Takeda et al), 212
Lipase
oat grains and milled oat fraction activity; localization (Urquhart et al), 181
Lipids
in brewers condensed solubles (Sebree et al), 147
distribution and effect on protein subunit composition in gliadin (Békés et al), 371
free fatty acid determination in extracts (Tweeten and Wetzel), 411
role in protein aggregation in gliadin fraction (Békés et al), 379
wax; in rice bran (Ito et al), 252
Lysine
method for distinguishing between high-lysine and normal-lysine barley kernels, communication to the editor (Ahokas), 330
in sorghum; rapid methods for estimating (Jambunathan et al), 192

Magnesium
in breads (Winterringer and Ranhotra), 14, *184*
phytate complexes; solubility characteristics (Cheryan et al), 235
Methods
chromatofocusing of iso-inhibitors in kintoki beans (Tsukamoto et al), 281
computer for wheat cultivar identification (Lookhart et al), 111
to determine phytate in wheat products and fecal samples (Ellis and Morris), 121
differential scanning colorimetry; effect of flour components and dough ingredients on starch gelatinization (Ghiasi et al), 58
for distinguishing between high-lysine and normal-lysine barley kernels, communication to the editor (Ahokas), 330
evaluation of emulsifiers and soy flours in *chapaties* (Ebeler and Walker), 270
instrumental measurement of spaghetti stickiness (Dexter et al), 139
model studies of cake baking; foam drainage in cake batter (Mizukoshi), 399
model studies of cake baking; silicone effect on foam stability of batter (Mizukoshi), 396
ninhydrin color test for screening maize (Sung and Lambert), 84
NIR for determining fiber in processed cereal foods (Baker), 217

Pelshenke test for estimating bread-making properties of hard winter wheats (Monsivais et al), 51
phosphorus detection on starch by graphite furnace atomic absorption (Hogen), 403
rapid, for detection of sprouting in wheat kernel populations (Jensen and Law), 406
rice stickiness determination with Instron tester (Mossman et al), 286
rice stickiness; Instron for varietal comparisons (Fellers et al), 292
separation of barley malt α-amylase by chromatofocusing (Marchylo and MacGregor), 311
Microbiology
microbial growth inhibition during slow drying of corn (Eckhoff et al), 185
Microscopy
fluorescence; in sorghum cell walls (Earp et al), 408
Millet
anatomy and histochemistry of (Irving), 155
milling process to produce low-fat grits (Abdelrahman et al), 189
proso-; tannins and phytate content in (Lorenz), 424
Milling
HRS wheat cumulative ash curves and relative milling value by computer analysis (Lillard and Hertsgaard), 42
of hard red spring wheat; effect on vomitoxin (Scott et al), 421
high moisture corn preserved with ammonia and dried with ambient air (Peplinski et al), 442
manual decortication in wooden mortar and pestle, laboratory milling related to pericarp thickness (Scheuring et al), 86
milled oat fractions; localization of lipase activity (Urquhart et al), 181
process to produce low-fat grits from pearl millet (Abdelrahman et al), 189
relationship between wheat kernel hardness and break flour yield (Yamazaki and Donelson), 344
standing vs. lodging of soft white wheat (Pumphrey and Rubenthaler), 268
Minerals
in brewers condensed solubles (Sebree et al), 147
content in flour and bran seed fractions of wheat cultivars (Peterson et al), 450
in wheat and flour (Pomeranz and Dikeman), 80
Moisture
imbibition by wheat in relation to caryopsis characteristics (Huang et al), 161
in stored barley; mycotoxin and odor formation in (Abramson et al), 350
in wheat; effect of mutual interactions on estimation of (Williams and Norris), 202
Mycotoxins
formation in stored barley (Abramson et al), 350

Oats
amino acid composition of (Morey and Evans), 461
characterization and functionality of protein concentrates from (Ma), 36
effect of germination on (Wu), 418
electrophoretic and developmental characterization of globulins (Robert et al), 231
electrophoretic characterization of prolamins (avenins) (Robert et al), 438
localization of lipase activity in grains and milled fractions (Urquhart et al), 181
Ozone
ambient at chronic levels; effect on field-grown corn (Garcia et al), 388

Particle size
of rice, effect of environmental changes on (Chen and Kunze), 238
Pasta
instrumental measurement of stickiness (Dexter et al), 139
modified screening test for estimation of gluten strength in durum wheat breeding lines (Dick and Quick), 315
noodles; measuring textural characteristics of (Oh et al), 433
pH
effect of, on mixograph studies (Hoseney and Brown), 124
Phenolic acids
HPLC separation and relation to fungal resistance of sorghum (Hahn et al), 255
Phytate
in proso millets (Lorenz), 424
Phytic acid
binding of trace elements to (Jacobsen and Slotfeldt-Ellingsen), 392
improved ion-exchange method (Ellis and Morris), 121
solubility characteristics (Cheryan et al), 235
Pizza
frozen; sodium in (Ranhotra et al), 325, *464*
Polysaccharides
indigestible; inhibitory effects on activities of digestible enzymes (Ikeda and Kusano), 260
Prolamins
oat-; characterization of cultivars of different protein content and from developing seeds (Robert et al), 438
Protein
A-gliadin, wheat storage protein, aggregation studies (Cole et al), 306
corn; optical rotatory dispersion, circular dichroism, conformation (Wu et al), 342
corn zein; polymorphism (Landry and Sallantin), 242
electrofocusing of; from modified hard-endosperm *opaque*-2 (Ortega and Bates), 107
high and low protein wheats, effect on composition (Fullington et al), 65
oat concentrate; characterization and functionality (Ma), 36
oat globulins; electrophoretic analysis of different cultivars and during development (Robert et al), 231
purification and characterization of three trypsin inhibitors from kintoki beans (Tsukamoto et al), 281
SDS-PAGE and IEF study of oat prolamins (avenins) of mature and developing seeds (Robert et al), 438
in sorghum; rapid methods for estimating (Jambunathan et al), 192
succinylated whey concentrate, farinograph characteristics and bread quality (Thompson and Baker), 71
in wheat; effect of mutual interactions on estimation of (Williams and Norris), 202
in wheat and flour (Pomeranz and Dikeman), 80

Rheology
chemically modified wheat gluten (Mita and Bohlin), 93
effects of gamma radiation of wheat (MacArthur and D'Appolonia), 456
Grain Research Laboratory compression tester description and application to measure bread-crumb properties (Kilborn et al), 134
viscosity; volume fraction behavior for corn and wheat starch (Christianson and Bagley), 116
Rice
bran; wax lipid in (Ito et al), 252
flour; for cake-baking (Bean et al), 445
stickiness determination with Instron tester (Mossman et al), 286
varietal comparisons with Instron method (Fellers et al), 292
yield and particle size affected by environmental changes (Chen and Kunze), 238
Rye
amino acid composition of (Morey and Evans), 461
extraction, separation, and polymorphism of prolamin storage proteins of (Shewry et al), 1

Scanning electron microscopy
anatomical study of channel millet seed (Irving), 155
of sorghum endosperm (Glennie et al), 27
of sorghum; pericarp thickness related to decortication (Scheuring et al), 86
of wheat (Huang et al), 161
Secalins
extraction, separation, and polymorphism (Shewry et al), 1
Sodium
in frozen pizzas (Ranhotra et al), 325, *464*
Sorghum
cooking characteristics of, for tortillas (Bedolla et al), 263
decortication in wooden mortar and pestle (Scheuring et al), 86
dehulling and grain size (Wills and Ali), 12
endosperm modification during germination (Glennie et al), 27
fluorescence microscopy of cell walls (Earp et al), 408
phenolic acids of, HPLC separation and relation to fungal resistance (Hahn et al), 255
preharvest fungal invasion of grain (Seitz et al), 127
preharvest; mycotoxin contamination in Southeast (McMillian et al), 226
rapid methods for estimating protein and lysine (Jambunathan et al), 192
Soybeans
amino acid composition of cultivars (Morey and Evans), 461
curd formation, varietal variation (Wang et al), 245
protein; sensory and volatile characteristics (Warner et al), 102
rate of hydration during soaking (Hsu et al), 208
Staling
bread; refreshening role (Pisesookbunterng et al), 301
bread; surfactant effect (Pisesookbunterng and D'Appolonia), 298
Grain Research Laboratory compression tester to measure bread-crumb properties (Kilborn et al), 134

Starch
aqueous by-products for improving bread quality (El-Saied and El-Farra), 131
corn; viscosity of dispersions (Christianson and Bagley), 116
detection of phosphorus added to or occurring naturally on (Hogen), 403
effect of flour components and dough ingredients on gelatinization (Ghiasi et al), 58
fragmented barley starch granules (DeHaas et al), 327
gelatinization and phase transitions of heat-moisture treated (Donovan et al), 381
granule hydrolysis inhibition by cycloheptaamylose (Weselake and Hill), 98
lily; physicochemical properties (Takeda et al), 212
physicochemical properties from sprouted wheat (Kulp et al), 355
quinoa, characterization of (Atwell et al), 9
wheat; enthalpy changes in model cake systems (Cloke et al), 143
wheat starch granule (particle) size distribution; nonlinear description (Baruch et al), 32
Storage
prevention of rancidity in rat diets, communication to the editor (Lohrey), 254
of rat diets for long-term feeding, communication to the editor (Briggs), 92
Sugar
effect on starch gelatinization (Ghiasi et al), 58
fructose with aspartame in layer cakes (Hess and Setser), 337
Surfactants
effect on bread staling (Pisesookbunterng and D'Appolonia), 298
refreshening role in bread staling (Pisesookbunterng et al), 301
silicone effects on foam drainage in cake batter (Mizukoshi), 399
silicone effects on foam stability of cake batter (Mizukoshi), 396

Tannins
in proso millets (Lorenz), 424
Tofu
varietal effect on yield and quality (Wang et al), 245
Tortillas
cooking characteristics of sorghum and corn for (Bedolla et al), 263
Triticale
amino acid composition of cultivars (Morey and Evans), 461
Trypsin inhibitor
heat inactivation of in kintoki bean (Tsukamoto et al), 194

Ultracentrifugation
fractionation of gluten proteins (Jones et al), 276
Ultrafiltration
reverse osmosis of corn stillage (Wu et al), 248
Ultrastructure
development and "undevelopment" of wheat dough by mixing; microscopic structure (Paredes-Lopez and Bushuk), 24
of sorghum endosperm (Glennie et al), 27

Viscosity
brewers condensed solubles (Sebree et al), 151
dependence on volume fraction of corn and wheat starch dispersions (Christianson and Bagley), 116
Vitamins
in brewers condensed solubles (Sebree et al), 147
Volatiles
during storage of rat diets, communication to the editor (Briggs), 92
in soybean protein products (Warner et al), 102

Wheat
aggregation of gliadin subunits with wheat lipids (Békés et al), 371, 379
amino acid composition of botanical constituents (Jensen and Martens), 172
amino acid composition of cultivars (Morey and Evans), 461
caryopsis structural and imbibitional characteristics (Huang et al), 161
containing vomitoxin; milling of (Scott et al), 421
cultivar identification by computer analysis (Lookhart et al), 111
durum; measurement of spaghetti stickiness (Dexter et al), 139
durum; modified screening test for estimation of gluten strength in (Dick and Quick), 315
effect of mutual interactions on estimation of protein and moisture in (Williams and Norris), 202
electrophoresis in variety identification (Khan et al), 178
evaluation in North African breads (Faridi and Rubenthaler), 74
gamma radiation, effects on dough and baking properties (MacArthur and D'Appolonia), 456
hard winter; Pelshenke test for estimating bread-making properties of (Monsivais et al), 51
heat-moisture treated wheat starch, calorimetry of (Donovan et al), 381
HRS; cumulative ash curves and relative milling value by computer analysis (Lillard and Hertsgaard), 42
kernel hardness affected by moisture and protein (Yamazaki and Donelson), 344
lodging effects on yield, milling, and baking (Pumphrey and Rubenthaler), 268
mineral and protein contents of (Pomeranz and Dikeman), 80
protein content, effect on electrophoresis patterns (Fullington et al), 65
sprouting detection by rapid method (Jensen and Law), 406
starch granule (particle) size distribution; nonlinear description (Baruch et al), 32
winter; field sprouting of (Kulp et al), 355
winter; preharvest sprouting of (Lorenz et al), 360
Wheat forage
amino acid composition of (Morey and Evans), 461

Zearalenone
contamination of preharvest sorghum (McMillian et al), 226
Zein
corn; conformation of (Wu et al), 342
corn; size and charge heterogeneity (Landry and Sallantin), 242
electrofocusing of; and zeinlike proteins from modified hard-endosperm *opaque*-2 (Ortega and Bates), 107

VOLUME 60, NUMBER 1 JANUARY-FEBRUARY 1983

iii Instructions to Authors

1 Extraction, Separation, and Polymorphism of the Prolamin Storage Proteins (Secalins) of Rye. *P. R. Shewry, S. Parmar,* and *B. J. Miflin*

7 Effect of Heat-Moisture Treatment on Textural Characteristics of Cassava Flour. *T. Emilia Abraham, K. C. M. Raja, E. P. Manoharan,* and *A. G. Mathew*

9 Characterization of Quinoa Starch. *W. A. Atwell, B. M. Patrick, L. A. Johnson,* and *R. W. Glass*

12 Effect of Grain Size on Dehulling of Sorghum. *R. B. H. Wills* and *M. R. Ali*

14 Relative Bioavailability of Magnesium from Mineral- and Soy-Fortified Breads. *G. L. Winterringer* and *G. S. Ranhotra*

19 Development and "Undevelopment" of Wheat Dough by Mixing: Physicochemical Studies. *O. Paredes-Lopez* and *W. Bushuk*

24 Development and "Undevelopment" of Wheat Dough by Mixing: Microscopic Structure and Its Relation to Bread-Making Quality. *O. Paredes-Lopez* and *W. Bushuk*

27 Endosperm Modification in Germinating Sorghum Grain. *C. W. Glennie, J. Harris,* and *N. V. D. W. Liebenberg*

32 Nonlinear Model of Wheat Starch Granule Distribution at Several Stages of Development. *D. W. Baruch, L. D. Jenkins, H. N. Dengate,* and *P. Meredith*

36 Chemical Characterization and Functionality Assessment of Protein Concentrates from Oats. *C.-Y. Ma*

42 Computer Analysis and Plotting of Milling Data: HRS Wheat Cumulative Ash Curves. *D. W. Lillard, Jr.* and *D. M. Hertsgaard*

46 Comparison of Nephelometric and Phadebas Methods of Determining Alpha-Amylase Activity in Wheat Flour Supplemented with Barley Malt. *Eric Hsu* and *E. Varriano-Marston*

51 The Pelshenke Test and Its Value in Estimating Bread-Making Properties of Hard Winter Wheats. *M. Monsivais, R. C. Hoseney,* and *K. F. Finney*

56 Use of Date Syrups in Breadmaking. *A. H. Al-Zubaydi, A. A. Al-Kaissi, K. A. Shaker,* and *S. M. Hamel*

58 Effects of Flour Components and Dough Ingredients on Starch Gelatinization. *K. Ghiasi, R. C. Hoseney,* and *E. Varriano-Marston*

62 Xanthan Gum in a Reduced-Egg-White Angel Food Cake. *L. L. Miller* and *C. Setser*

65 Quantitative Sodium Dodecyl Sulfate-Polyacrylamide Gel Electrophoresis of Total Proteins Extracted from Different Wheat Varieties: Effect of Protein Content. *J. G. Fullington, E. W. Cole,* and *D. D. Kasarda*

71 Influence of Succinylated Whey Protein Concentrate on Farinograph Characteristics and Bread Quality. *L. U. Thompson* and *L. M. Baker*

74 Experimental Baking Techniques for Evaluating Pacific Northwest Wheats in North African Breads. *H. A. Faridi* and *G. L. Rubenthaler*

80 NOTE: Minerals and Protein Contents in Hard Red Winter Wheat Flours. *Y. Pomeranz* and *E. Dikeman*

82 NOTE: Dietary Fiber Content of Different Cereal Products in Norway. *W. Frølich* and *B. Hestangen*

84 NOTE: Ninhydrin Color Test for Screening Modified Endosperm *Opaque*-2 Maize. *T. M. Sung* and *R. J. Lambert*

86 NOTE: Sorghum Pericarp Thickness and Its Relation to Decortication in a Wooden Mortar and Pestle. *J. F. Scheuring, S. Sidibe, L. W. Rooney,* and *C. F. Earp*

90 NOTE: Characteristics of Bread and Sponge Cake Baked from Wheat Flour Exposed to Gaseous Ammonia. *M. Terada, J. Minami,* and *T. Yamamoto*

92 COMMUNICATION TO THE EDITOR. *G. M. Briggs*

92 Erratum

VOLUME 60, NUMBER 2 MARCH-APRIL 1983

iii Instructions to Authors

93 Shear Stress Relaxation of Chemically Modified Gluten. *T. Mita* and *L. Bohlin*

98 Inhibition of Alpha-Amylase-Catalyzed Starch Granule Hydrolysis by Cycloheptaamylose. *R. J. Weselake* and *R. D. Hill*

102 Relationships of Sensory Characteristics and Gas Chromatographic Profiles of Soybean Protein Products. *K. Warner, T. L. Mounts, J. J. Rackis,* and *W. J. Wolf*

107 Biochemical and Agronomic Studies of Two Modified Hard-Endosperm *Opaque*-2 Maize (*Zea mays* L.) Populations. *E. I. Ortega* and *L. S. Bates*

111 Computer-Assisted Method for Identifying Wheat Cultivars from Their Gliadin Electrophoregrams. *G. L. Lookhart, B. L. Jones, D. E. Walker, S. B. Hall,* and *D. B. Cooper*

116 Apparent Viscosities of Dispersions of Swollen Cornstarch Granules. *D. D. Christianson* and *E. B. Bagley*

121 Improved Ion-Exchange Phytate Method. *R. Ellis* and *E. R. Morris*

127 Preharvest Fungal Invasion of Sorghum Grain. *L. M. Seitz, H. E. Mohr, R. Burroughs,* and *J. A. Glueck*

131 Utilization of Aqueous By-Products from Starch for Improving Bread Quality. *H. M. El-Saied* and *A.-H. A. El-Farra*

134 Grain Research Laboratory Compression Tester: Its Description and Application to Measurement of Bread-Crumb Properties. *R. H. Kilborn, K. H. Tipples,* and *K. R. Preston*

139 Grain Research Laboratory Compression Tester: Instrumental Measurement of Cooked Spaghetti Stickiness. *J. E. Dexter, R. H. Kilborn, B. C. Morgan,* and *R. R. Matsuo*

143 Enthalpy Changes in Model Cake Systems Containing Emulsifiers. *J. D. Cloke, J. Gordon,* and *E. A. Davis*

147 Brewers Condensed Solubles. I. Composition and Physical Properties. *B. R. Sebree, D. S. Chung,* and *P. A. Seib*

151 Brewers Condensed Solubles. II. Viscosity and Viscosity Reduction of Brewers Condensed Solubles by Cellulase and Beta-Glucanase. *B. R. Sebree, D. S. Chung,* and *P. A. Seib*

155 Anatomy and Histochemistry of *Echinochloa turnerana* (Channel Millet) Spikelet. *D. W. Irving*

161 Caryopsis Structural and Imbibitional Characteristics of Some Hard Red and White Wheats. *G. Huang, A. J. McCrate, E. Varriano-Marston,* and *G. M. Paulsen*

166 Glutamic Acid Decarboxylase Activity as a Measure of Percent Germination for Barley. *W. M. Lamkin, S. W. Nelson, B. S. Miller,* and *Y. Pomeranz*

172 The Botanical Constituents of Wheat and Wheat Milling Fractions. II. Quantification by Amino Acids. *S. A. Jensen* and *H. Martens*

178 NOTE: Polyacrylamide Gel Electrophoresis of Gliadin Proteins for Wheat Variety Identification—Procedural Modifications and Observations. *K. Khan, C. E. McDonald,* and *O. J. Banasik*

181 NOTE: Localization of Lipase Activity in Oat Grains and Milled Oat Fractions. *A. A. Urquhart, I. Altosaar, G. J. Matlashewski,* and *M. R. Sahasrabudhe*

184 Errata

VOLUME 60, NUMBER 3 MAY-JUNE 1983

185 Microbial Growth Inhibition by SO_2 or SO_2 Plus NH_3 Treatments During Slow Drying of Corn. *S. R. Eckhoff, J. F. Tuite, G. H. Foster, A. W. Kirleis,* and *M. R. Okos*

189 Milling Process to Produce Low-Fat Grits from Pearl Millet. *A. Abdelrahman, R. C. Hoseney,* and *E. Varriano-Marston*

192 Rapid Methods for Estimating Protein and Lysine in Sorghum (*Sorghum bicolor* (L.) Moench). *R. Jambunathan, N. S. Rao,* and *S. Gurtu*

194 Heat Inactivation of Trypsin Inhibitor in Kintoki Bean (*Phaseolus vulgaris*). *I. Tsukamoto, M. Miyoshi,* and *Y. Hamaguchi*

198 Nutritional Quality of Winged Bean Composite Breads. *G. O. Nmorka* and *B. O. Okezie*

202 Effect of Mutual Interactions on the Estimation of Protein and Moisture in Wheat. *P. C. Williams* and *K. H. Norris*

208 Factors Affecting Water Uptake of Soybeans During Soaking. *K. H. Hsu, C. J. Kim,* and *L. A. Wilson*

212 Physicochemical Properties of Lily Starch. *C. Takeda, Y. Takeda,* and *S. Hizukuri*

217 The Determination of Fiber in Processed Cereal Foods by Near-Infrared Reflectance Spectroscopy. *D. Baker*

220 Baking and Related Properties of Wheat-Oat Composite Flours. *B. D. Oomah*

226 Mycotoxin Contamination in Grain Sorghum from Fields in Georgia and Mississippi. *W. W. McMillian, D. M. Wilson, C. J. Mirocha,* and *N. W. Widstrom*

227 Prediction of Cookie Quality from Dietary Fiber Components. *M. A. Jeltema, M. E. Zabik,* and *L. J. Thiel*

231 Electrophoretic and Developmental Characterization of Oat (*Avena sativa* L.) Globulins in Cultivars of Different Protein Content. *L. S. Robert, G. J. Matlashewski, K. Adeli, C. Nozzolillo,* and *I. Altosaar*

235 Magnesium-Phytate Complexes: Effect of pH and Molar Ratio on Solubility Characteristics. *M. Cheryan, F. W. Anderson,* and *F. Grynspan*

238 Effect of Environmental Changes in Rice Yield and Particle Size of Broken Kernels. *Y.-L. Chen* and *O. R. Kunze*

242 Polymorphism of Native Zein as Detected by Gel Filtration and Electrophoresis in the Presence or Absence of Sodium Dodecyl Sulfate. *J. Landry* and *M. Sallantin*

245 Effect of Soybean Varieties on the Yield and Quality of Tofu. *H. L. Wang, E. W. Swain,* and *W. F. Kwolek*

248 Reverse Osmosis of Soluble Fraction of Corn Stillage. *Y. V. Wu, K. R. Sexson,* and *J. S. Wall*

252 NOTE: Wax Lipid in Rice Bran. *S. Ito, T. Suzuki,* and *Y. Fujino*

254 COMMUNICATION TO THE EDITOR. *Evelyn E. Lohrey*

254 Erratum

VOLUME 60, NUMBER 4 JULY-AUGUST 1983

255 Sorghum Phenolic Acids, Their High Performance Liquid Chromatography Separation and Their Relation to Fungal Resistance. *D. H. Hahn, J. M. Faubion,* and *L. W. Rooney*

260 In Vitro Inhibition of Digestive Enzymes by Indigestible Polysaccharides. *K. Ikeda* and *T. Kusano*

263 Cooking Characteristics of Sorghum and Corn for Tortilla Preparation by Several Cooking Methods. *S. Bedolla, M. G. de Palacios, L. W. Rooney, K. C. Diehl,* and *M. N. Khan*

268 Lodging Effects on Yield and Quality of Soft White Wheat. *F. V. Pumphrey* and *G. L. Rubenthaler*

270 Wheat and Composite Flour *Chapaties*: Effects of Soy Flour and Sucrose-Ester Emulsifiers. *S. E. Ebeler* and *C. E. Walker*

276 Physical and Biochemical Properties of Wheat Protein Fractions Obtained by Ultracentrifugation. *B. L. Jones, K. F. Finney,* and *G. L. Lookhart*

281 Purification and Characterization of Three Trypsin Inhibitors from Beans, *Phaseolus vulgaris*, 'Kintoki.' *I. Tsukamoto, M. Miyoshi,* and *Y. Hamaguchi*

286 Rice Stickiness. I. Determination of Rice Stickiness with an Instron Tester. *A. P. Mossman, D. A. Fellers,* and *H. Suzuki*

292 Rice Stickiness. II. Application of an Instron Method to Make Varietal Comparisons and to Study Modification of Milled Rice by Hot-Air Treatment. *D. A. Fellers, A. P. Mossman,* and *H. Suzuki*

295 Evaluation of Distillers' Dried Grain Flour as a Bread Ingredient. *C. C. Tsen, J. L. Weber,* and *W. Eyestone*

298 Bread Staling Studies. I. Effect of Surfactants on Moisture Migration from Crumb to Crust and Firmness Values of Bread Crumb. *W. Pisesookbunterng* and *B. L. D'Appolonia*

301 Bread Staling Studies. II. The Role of Refreshening. *W. Pisesookbunterng, B. L. D'Appolonia,* and *K. Kulp*

306 Aggregation of A-Gliadin: Gel Permeation Chromatography. *E. W. Cole, J. V. Torres,* and *D. D. Kasarda*

311 Separation of Barley Malt Alpha-Amylase by Chromatofocusing. *B. A. Marchylo* and *A. W. MacGregor*

315 A Modified Screening Test for Rapid Estimation of Gluten Strength in Early-Generation Durum Wheat Breeding Lines. *J. W. Dick* and *J. S. Quick*

319 Physicochemical Changes in Cornstarch as a Function of Extrusion Variables. *J. Owusu-Ansah, F. R. van de Voort,* and *D. W. Stanley*

325 NOTE: Sodium in Commercially Produced Frozen Pizzas. *G. S. Ranhotra, J. L. Vetter, J. A. Gelroth,* and *F. A. Novak*

327 NOTE: Barley Starch. VII. New Barley Starches with Fragmented Granules. *B. W. DeHaas* and *K. J. Goering*

330 COMMUNICATION TO THE EDITOR: A Simple and Inexpensive Visual Method for Distinguishing Between High-Lysine and Normal-Lysine Barley Kernels. *H. Ahokas*

332 COMMUNICATION TO THE EDITOR. *Claude Willemot* and *John D. Jones*

VOLUME 60, NUMBER 5 SEPTEMBER-OCTOBER 1983

333 Compositional, Physical, and Sensory Characteristics of *Akara* Processed from Cowpea Paste and Nigerian Cowpea Flour. *K. H. McWatters*

337 Alternative Systems for Sweetening Layer Cakes Using Aspartame With and Without Fructose. *D. A. Hess* and *C. S. Setser*

342 Conformation of Corn Zein and Glutelin Fractions with Unusual Amino Acid Sequence. *Y. V. Wu, J. W. Paulis, K. R. Sexson,* and *J. S. Wall*

344 Kernel Hardness of Some U.S. Wheats. *W. T. Yamazaki* and *J. R. Donelson*

350 Mycotoxin and Odor Formation in Barley Stored at 16 and 20% Moisture in Manitoba. *D. Abramson, R. N. Sinha,* and *J. T. Mills*

355 Preharvest Sprouting of Winter Wheat. I. Rheological Properties of Flours and Physicochemical Characteristics of Starches *K. Kulp, P. Roewe-Smith,* and *K. Lorenz*

360 Preharvest Sprouting of Winter Wheat. II. Amino Acid Composition and Functionality of Flour and Flour Fractions. *K. Lorenz, P. Roewe-Smith, K. Kulp,* and *L. Bates*

367 Effects of Soy of Field Pea Flour Substitution on Physical and Sensory Characteristics of Chemically Leavened Quick Breads. *M. A. Raidl* and *B. P. Klein*

371 Protein-Lipid Complexes in the Gliadin Fraction. *F. Békés, U. Zawistowska,* and *W. Bushuk*

379 Lipid-Mediated Aggregation of Gliadin. *F. Békés, U. Zawistowska,* and *W. Bushuk*

381 Differential Scanning Calorimetry of Heat-Moisture Treated Wheat and Potato Starches. *J. W. Donovan, K. Lorenz,* and *K. Kulp*

388 Quality of Corn Grain from Plants Exposed to Chronic Levels of Ozone. *W. J. Garcia, J. F. Cavins, G. E. Inglett, A. S. Heagle,* and *W. F. Kwolek*

392 Phytic Acid and Metal Availability: A Study of Ca and Cu Binding. *T. Jacobsen* and *D. Slotfeldt-Ellingsen*

396 Model Studies of Cake Baking. III. Effects of Silicone on Foam Stability of Cake Batter. *M. Mizukoshi*

399 Model Studies of Cake Baking. IV. Foam Drainage in Cake Batter. *M. Mizukoshi*

403 Detection of Phosphorus on Starch by Atomic Absorption and the Graphite Furnace. *M. L. Hogen*

406 NOTE: A Rapid Method for the Detection of Sprouting in Populations of Wheat Kernels. *Sv. A. Jensen* and *D. P. Law*

408 NOTE: Fluorescence Microscopy of the Pericarp, Aleurone Layer, and Endosperm Cell Walls of Three Sorghum Cultivars. *C. F. Earp, C. A. Doherty,* and *L. W. Rooney*

VOLUME 60, NUMBER 6 NOVEMBER-DECEMBER 1983

411 Selective Derivatization and High Performance Liquid Chromatographic Analysis of Free Fatty Acids in Lipid Extracts. *T. N. Tweeten* and *D. L. Wetzel*

413 Germination of Soft White Wheat and Its Effect on Flour Fractions, Breadbaking, and Crumb Firmness. *M. M. Morad* and *G. L. Rubenthaler*

418 Effect of Germination on Oats and Oat Protein. *Y. V. Wu*

421 Effects of Experimental Flour Milling and Breadbaking on Retention of Deoxynivalenol (Vomitoxin) in Hard Red Spring Wheat. *P. M. Scott, S. R. Kanhere, P.-Y. Lau, J. E. Dexter,* and *G. Greenhalgh*

424 Tannins and Phytate Content in Proso Millets (*Panicum miliaceum*). *K. Lorenz*

427 Interaction of a Purified Bean (*Phaseolus vulgaris*) Glycoprotein with an Insect Amylase. *J. R. Powers* and *J. D. Culbertson*

429 Composition of Acid- and Alkali-Extracted Barley Proteins as Revealed by Isoelectric Focusing. *A. M. El-Negoumy, C. W. Newman,* and *B. R. Moss*

433 Noodles. I. Measuring the Textural Characteristics of Cooked Noodles. *N. H. Oh, P. A. Seib, C. W. Deyoe,* and *A. B. Ward*

438 Molecular Weight and Charge Heterogeneity of Prolamins (Avenins) from Nine Oat (*Avena sativa* L.) Cultivars of Different Protein Content and from Developing Seeds. *L. S. Robert, C. Nozzolillo,* and *I. Altosaar*

442 Physical Testing and Dry Milling of High-Moisture Corn Preserved with Ammonia While Drying with Ambient Air. *A. J. Peplinski, S. R. Eckhoff, K. Warner,* and *R. A. Anderson*

445 Rice Flour Treatment for Cake-Baking Applications. *M. M. Bean, E. A. Elliston-Hoops,* and *K. D. Nishita*

450 Evaluation of Variation in Mineral Element Concentrations in Wheat Flour and Bran of Different Cultivars. *C. J. Peterson, V. A. Johnson,* and *P. J. Mattern*

456 Gamma Radiation of Wheat. I. Effects on Dough and Baking Properties. *L. A. MacArthur and B. L. D'Appolonia*

461 Amino Acid Composition of Six Grains and Winter Wheat Forage. *D. D. Morey* and *J. J. Evans*
